3.7 Bulk operations	Multi-select on users + enrolments
3.8 Change a user's role	With cascade behaviour
4. Reference	Permissions, file limits, email triggers
5. Admin FAQ	Common questions

1. Overview

NCFE LMS is the SkillHub Learning Management System for UK vocational qualifications. It supports the full assessment lifecycle from learner onboarding through to IQA sign-off across four roles: **admin**, **assessor**, **student/learner**, and **IQA**. This guide covers the **admin** role specifically.

Where you fit in the data model

Centre → Qualification → Unit → Learning Outcome → Assessment Criterion

User (with role) ■ Enrolment ■ Assessment ■ Evidence ■ IQA Decision

An **Enrolment** links a student to a qualification under a specific assessor and cohort. An **Assessment** sits inside an enrolment and maps one or more evidence files to one or more Assessment Criteria.

Production URL

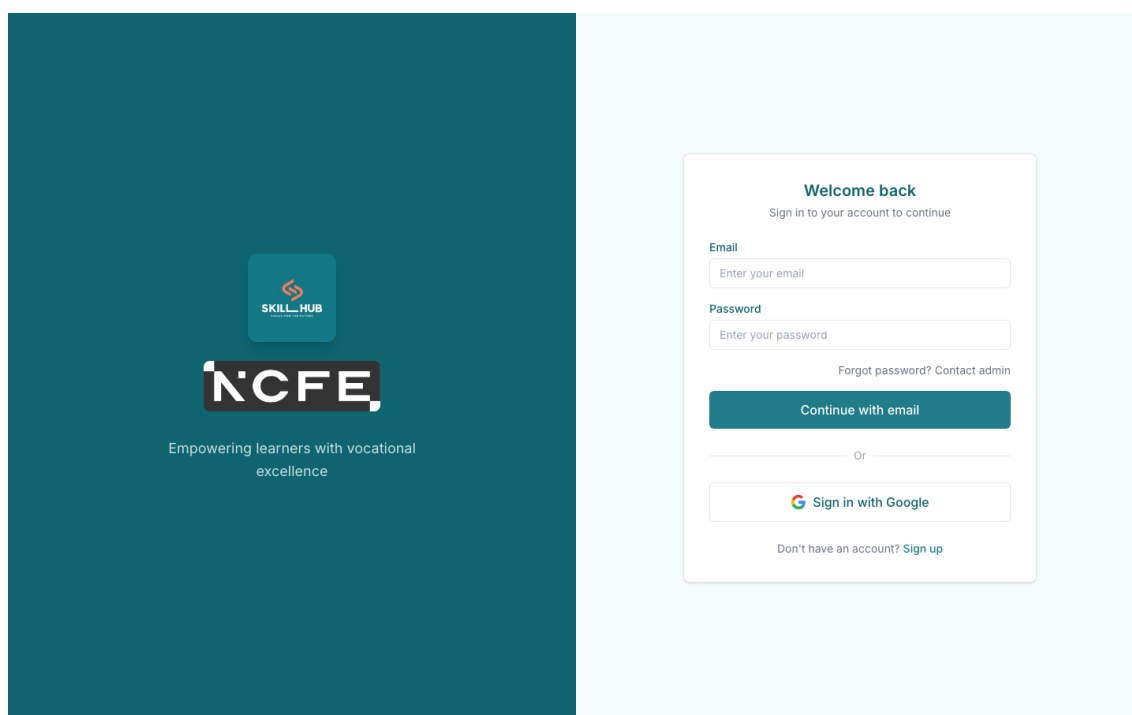

<https://ncfe-lms.onrender.com>

Where to get help

You are the help. Other roles route password resets and account questions back to you. For technical issues with the platform itself, contact the platform owner at SkillHub.

2. Signing in

Open <https://ncfe-lms.onrender.com/sign-in>, enter your email and password, click **Continue with email**.

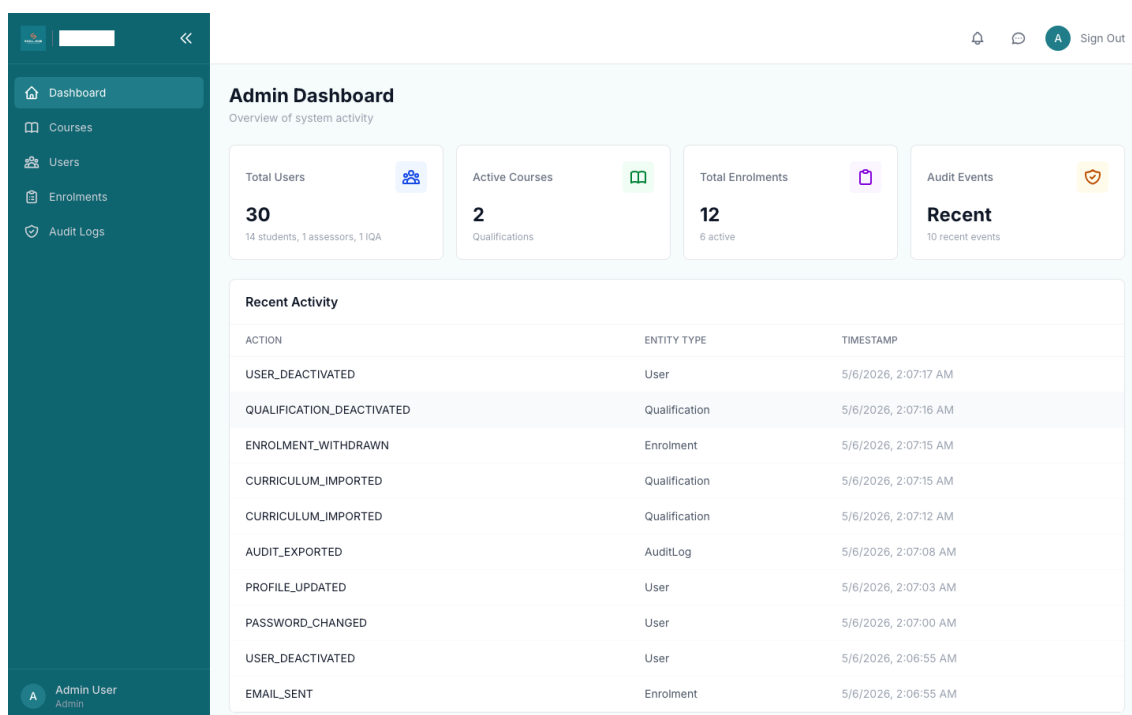

Sign-in page

Where each role lands after sign-in

Role	Lands on
Admin	/admin/dashboard
Assessor	/c (course list)
Student	/c (course list)
IQA	/dashboard (IQA home)

Forgot your password? The link on the sign-in page takes users to a contact-administrator notice — but as admin, you have your password reset workflow on /admin/users. If you have lost the admin account itself, the platform owner at SkillHub can issue a recovery.

3. Admin tasks

Admin dashboard at /admin/dashboard

3.1 Onboard a new student

The most common admin task. The user-create form combines account creation with enrolment in a single submit so you do not have to go to two screens.

- 1 Navigate to **/admin/users**.
- 2 Click **Add User** (top right).
- 3 Fill **Name** and **Email**. Leave **Role** as *student*.
- 4 Click **Generate** to auto-fill a secure 14-character password. (Or type your own — minimum 8 characters.)
- 5 In the **Enrolment block that appears below Role**, pick a Qualification, an Assessor, and a Cohort. Filling all three creates the enrolment in the same submit. Leaving them blank just creates the account; you can enrol the student later.
- 6 Click **Create**.
- 7 The success modal shows the password, an email-sent confirmation, and the enrolment line if you filled it. Click **Copy all credentials** to put a 4-line block on your clipboard for the student.

Admin users list at /admin/users

Common mistake. Filling only one or two of the three enrolment fields. The form blocks the submit and asks you to either fill all three or clear all three.

If the welcome email fails (for example Brevo is down or the recipient has an unreachable inbox), the success modal shows an amber warning instead of the green check. The account is still created — share the credentials manually using **Copy all credentials** and click **Resend** on the user row when the email service is back.

3.2 Enrol an existing student in another course

Students can be enrolled in multiple qualifications simultaneously.

- 1 Open `/admin/users`.
- 2 Find the student's row. Click the green **Enrol** action button.
- 3 In the modal that opens, pick a Qualification, an Assessor, and a Cohort. Submit.
- 4 If the student has not opted out, they receive a 'You've been enrolled in [course]' email.

3.3 View a student's enrolments

Click the student's name (or the View action) on `/admin/users` to open `/admin/users/{id}`. The detail page shows the profile fields plus every enrolment with status, cohort, assessor, and a per-row Withdraw action.

3.4 Reset a password / resend welcome email

Self-service password reset is disabled — admin owns passwords. When a student forgets their password:

- 1 Open `/admin/users` and find their row.
- 2 Click **Reset PW**.
- 3 Click **Generate** in the dialog (or type a password).
- 4 Submit. The success modal shows the new password — copy it and share it with the student.
- 5 The user keeps the new password until you reset it again.

Resend welcome. If a welcome email did not arrive, click **Resend** on the user row. This generates a fresh password, updates the user, and sends a new welcome email. The success dialog shows the new password.

3.5 Manage qualifications

TITLE	CODE	LEVEL	UNITS	STATUS	ACTIONS

Qualification list at `/admin/courses`

`/admin/courses` lists every qualification in the centre. Click into one to open its curriculum tree. From the detail page you can add Units, Learning Outcomes, and Assessment Criteria one at a time, or bulk-import the whole tree from a CSV.

Bulk CSV curriculum import

On `/admin/courses/{id}`, click **Import CSV**. Provide a CSV with these columns:

Unit Reference, LO Number, AC Number, Description, [Evidence Requirements]

The header row is optional. Click **Preview** first to see how many Units / LOs / ACs will be created and how many will be skipped as duplicates. Re-importing the same CSV is fully idempotent — existing rows are deduped server-side by reference, so it is safe to re-run.

3.6 Audit trail and export

Audit Logs
View system activity and change history

Entity type: **All** | Action contains: **USER_CREATED, EMAIL_SENT** | From: **dd/mm/yyyy** | To: **dd/mm/yyyy** | **↓ Newest first** | **Export CSV**

Filter by user:

Audit log at /admin/audit-logs

/admin/audit-logs records every meaningful action: user creates, password resets, sign-offs, IQA decisions, enrolment changes, email sends and failures. Filter by:

- **Entity type** — User, Assessment, Enrolment, etc.
- **Action contains** — substring match. Example: *EMAIL_SENT*, *USER_CREATED*.
- **From / To** date range.
- **Filter by user** — search-as-you-type.
- Sort direction toggle.

Click **Export CSV** to download the current filtered view as a CSV for your centre's quality records.

3.7 Bulk operations on users

/admin/users supports multi-select for bulk actions. To use:

- 1 Tick the checkbox at the start of each row you want to act on, or click the header checkbox to select the whole page.
- 2 A sticky toolbar appears at the top of the list showing the selected count.
- 3 Open the **Bulk action** dropdown and pick one of: **Deactivate selected**, **Resend welcome email**, **Export selected as CSV**.
- 4 Confirm in the dialog if prompted. The action runs server-side and shows a result modal with success / failure counts.

Filter chips. Above the table: *All / Active only / Inactive only* plus role chips (Student / Assessor / IQA / Admin). Use these to narrow before bulk-selecting.

Limits. Bulk requests are capped at 100 ids per submit; the bulk dropdown is disabled if you select more. Resend welcome is rate-limited to 10 ops per minute per admin to avoid hammering the email provider.

Bulk operations on /admin/enrolments follow the same pattern: the actions are **Withdraw selected** and **Export selected as CSV**; the filter chips are *All / In progress / Completed / Withdrawn*. The 'In progress' chip covers both newly-enrolled and in-progress statuses.

Enrolment list at /admin/enrolments

3.8 Change a user's role

On the user edit form the **Role** dropdown is editable. Promoting a student to assessor / IQA / admin works the same way as creating any other user; demoting a non-student to student creates an account with no enrolments (you can add them via the Enrol action).

Demoting a student to a non-student role automatically withdraws all of their enrolled / in progress enrolments. An audit log *USER_ROLE_CHANGED* records the role transition and the count of

enrolments withdrawn.

4. Reference

4.1 Roles and permissions

Capability	Admin	Assessor	Student	IQA
Sign in	✓	✓	✓	✓
Access /admin/*	✓	—	—	—
Create users / qualifications / enrolments	✓	—	—	—
Reset passwords / resend welcome	✓	—	—	—
View / export audit logs	✓	—	—	—
Bulk CSV curriculum import	✓	—	—	—
Create assessments	—	✓	—	—
Map criteria + evidence	—	✓	—	—
Sign off assessment (assessor)	—	✓	—	—
Upload portfolio evidence	—	—	✓ own	—
Sign off assessment (learner)	—	—	✓ own	—
Log work hours	—	✓	✓ own	—
Sample assessor work	—	—	—	✓
Record IQA decision	—	—	—	✓
Self-service password reset	—	—	—	—

4.2 File upload limits

Setting	Value
Max single file size	2 GB
Avatar limit	2 MB (PNG / JPEG / WEBP / GIF)
Allowed extensions	.pdf, .doc, .docx, .xls, .xlsx, .ppt, .pptx, .txt, .png, .jpg, .jpeg, .gif, .webp, .mp4, .mov, .avi, .
Storage	AWS S3 bucket (region ap-south-1); large evidence uploads via presigned URLs

4.3 Email notification triggers

Event	Recipient	Honors opt-out?
Admin creates user	New user	No (always-on)
Admin resets password	Affected user	No
Admin clicks Resend welcome	Affected user	No
Assessor signs off assessment	Student	Yes
IQA submits decision	Assessor + student	Yes
Admin enrolls user in course	Student	Yes

Email failures are **soft-fail**: the originating action (user create, sign-off, decision) always succeeds even if the email provider is down. Failures are recorded as *EMAIL_FAILED* in the audit log with the error message.

4.4 Recently shipped admin features

Feature	What it does
Combined create + enrol	Pick Qualification / Assessor / Cohort directly on the Add User form.
User detail page	Click into a user from /admin/users to see their profile + every enrolment with per-row v
Audit log filters + CSV export	Multi-axis filtering (action / entity / user / date range) plus single-click export.
Bulk CSV curriculum import	Idempotent dedup, preview before commit, on /admin/courses/{id}.
Bulk operations	Multi-select on /admin/users and /admin/enrolments with deactivate / withdraw / export
Role change with cascade	Demoting a student auto-withdraws their active enrolments. Audited.
Cookie consent + privacy page	First-time visitors see a consent banner; /privacy describes data handling.
Empty / loading / error states	Every list page shows a consistent placeholder when empty or loading; retry button on

5. Admin FAQ

Q. How do I add a student to multiple courses?

A. Two ways. (1) Use the Qualification / Assessor / Cohort fields on the Add User form to enrol them at create time. (2) After they exist, click **Enrol** on their row in /admin/users, or open their detail page and click + **Add enrolment**. Repeat as many times as needed.

Q. I created a user but no welcome email arrived. What went wrong?

A. Check the success modal. A green check + 'Email sent ✓' means Brevo accepted the email — most likely it landed in spam (single-sender Brevo deliverability is moderate until domain authentication is set up). Check /admin/audit-logs for *EMAIL_SENT* or *EMAIL_FAILED*. If failed, the user was still created — share credentials manually using **Copy all credentials** in the modal, or click **Resend** on the row.

Q. A student says they forgot their password. What do I do?

A. Self-service reset is disabled by design. Go to /admin/users, click **Reset PW** on their row, click **Generate**, submit. The success modal shows the new password — copy it and share it with the student. They keep the new password until you reset it again.

Q. What happens when I delete a user?

A. Admin **delete is a soft delete**. The user gets *status: inactive* and can no longer sign in, but the row stays in the database — their assessments, evidence, and enrolments remain intact for audit. To re-activate, edit the user and switch status back to *active*.

Q. How do I bulk-import a qualification's curriculum?

A. On /admin/courses/{id}, click **Import CSV**. Provide a CSV with columns *Unit Reference*, *LO Number*, *AC Number*, *Description*, *[Evidence Requirements]*. The dialog has a Preview button that shows expected counts before committing. Re-importing is idempotent — duplicates are deduped server-side by reference.

Q. How do I deactivate multiple students at once?

A. /admin/users → tick the checkboxes you want to act on (or click the header checkbox to select the page). The sticky toolbar appears at the top with a **Bulk action** dropdown — pick *Deactivate selected*, confirm, and every selected student is flipped to *status: inactive* in one round-trip. The same toolbar covers *Resend welcome email* (rate-limited to 10 per minute) and *Export selected as CSV*. Capped at 100 rows per request.

Q. The audit log is huge. How do I find what changed yesterday between 2 PM and 4 PM?

A. /admin/audit-logs → set **From** = yesterday and **To** = yesterday (the API includes the entire end day). Add an Action filter (e.g. *USER_CREATED*) or pick a specific user via **Filter by user**. Click **Export CSV** for an offline review.

Q. A user asked to opt out of email notifications. How?

A. They can do it themselves: /profile → **Edit profile** → toggle off any of the three checkboxes (Assessor sign-off / IQA decisions / New course enrolments). The next event of that type skips them. Welcome and password-reset emails are always-on and cannot be opted out.

Q. Brevo says 'Email failed' because the recipient bounced. Can I retry?

A. Click **Resend** on the user row. That generates a fresh password, updates the user, and sends a new welcome email. If Brevo is back up, the new send goes through.

Q. How do I change the email sender display name (e.g. from 'NCFE LMS' to a centre-specific name)?

A. Edit the `BREVO_SENDER_NAME` environment variable on Render → service → Environment tab and save. Render auto-redeploys. The verified sender mailbox does not change — only the display name.

Q. Can I delete the James Bond demo account?

A. **No.** 7777jamesbond7777@gmail.com is the canonical demo account. Deleting it will break the demo workflow and several test fixtures.

Q. Why do some users have an 'n courses' badge and others don't?

A. The badge only renders for student-role users. Assessors / IQA / admin do not have enrolments in the same sense, so the chip is hidden.
